

Stolen Custom Wood Net!

One of the very first Custom Drift Boat Nets I made for a Grey/Bruce Outdoors Member has been stolen.

It was taken on the **evening of Thursday March 20/2014** from a Drift Boat parked at a store in Sauble while the owner was inside.

The net taken is Number 008. It is one of a kind, the person who stole it probably has no idea that this net is extremely identify-able and unique, they do not have a hope in hell of saying they bought it somewhere!! *Unless they bought it from the thief.*

The net can be identified by the 40 inch handle with a hand drawn and extremely unique fish woodburning at the top and the flamed appearance on the net frame & handle, as you can see in the photo there are burn marks all over the net, on purpose. (see photos)

If anyone saw somebody lifting stuff out of a drift boat in Sauble last Thursday evening while it was parked at a store please contact me. admin@greybruceoutdoors.com

If the thief has second thoughts, knowing the net is extremely identifiable and being looked for by thousands of anglers, simply drop it off at any local tackle shop with a note asking it be returned to admin@greybruceoutdoors.com and avoid a trip to jail.

If anyone else should happen to find it please let me know, your honesty and assistance in getting this net back to its rightful owner will be rewarded.

Thank you for your assistance in finding this item!
